

Project Profile

Construction on the buildings was quick and efficient thanks to the prefabrication of the panels and other materials supplied by Panels Pros.

The expansive job site allowed multiple processes of the building to be performed at the same time.

Panels were raised easily with the help of a crane.

MinuteMan Commons

Location: Lincoln, MA

Product Specified: Insulspan® Structural Insulating Panel System

Project Description:

This condo project has 32 units that are configured in 4 building clusters. The buildings are complete Insulspan SIP 6" walls and 10" roof. This large multi unit for the construction of energy efficient condos were installed by Panel Pros, Inc. near Boston, Massachusetts. Panel Pros supplied the Insulspan structural insulating wall and roof panels, along with prefabricated floor and partitions to rapidly erect the building shells for the Mayo Group, the general contractors on this project.
